

Mark Scheme (Results)

January 2022

Pearson Edexcel International GCSE
In Biology (4BI1) Paper 2B

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Additional guidance	Mark
1(a)	<u>lymphocytes</u> / eq	Ignore white blood cells Reject phagocytes	1

Question Number	Answer	Additional guidance	Mark
1 (b)(i)	An answer that makes reference to one of the following: <ul style="list-style-type: none"> • both alleles expressed (1) • both alleles affect the phenotype (1) • both alleles show their characteristics / traits (1) 	Accept both alleles work together / both alleles work together to form a third phenotype / phenotype depends upon both alleles	1

Question Number	Answer	Additional guidance	Mark
1 (b)(ii)	The correct answer is D (A, B, AB and O) A is incorrect as the cross could also produce AB and O B is incorrect as the cross could produce also AB and O C is incorrect as the cross could also produce A, and B		1

Question Number	Answer	Additional guidance	Mark
1 (c)	$4.7(4) \times 10^7$ (2)	one mark for 47400000 or 47.4 million or 47 million or other incorrect standard forms using 47(4) Correct answer gains all marks	2

Question Number	Answer	Additional guidance	Mark
1(d)	<p>An explanation that makes reference to the following:</p> <ul style="list-style-type: none"> artificial cells are not (bi)concave / red blood cells are (bi)concave (1) artificial cells have smaller SA(:vol ratio) / red blood cells have larger SA (:vol ratio) (1) artificial cells absorb / bind / release less oxygen / red blood cells absorb bind more oxygen / release more oxygen / eq (1) artificial cells do not pass through capillaries easily / eq / red blood cells pass through capillaries more easily / eq (1) 	<p>Accept artificial cells carry less oxygen / red blood cells carry more oxygen</p> <p>Accept artificial cells have slower diffusion (of oxygen) / red blood cells have faster diffusion (of oxygen)</p>	3

Question Number	Answer	Additional guidance	Mark
1(e)	<p>An explanation that makes reference to the following:</p> <ul style="list-style-type: none"> no platelets (1) 	<p>Allow no fibrinogen</p>	1

Question Number	Answer	Additional guidance	Mark
1 (f)	<p>An explanation that makes reference to two of the following:</p> <ul style="list-style-type: none"> • no / less water uptake / eq (1) • by osmosis / due to osmotic effects (1) • so cells do not burst / eq (1) 	<p>Accept converse</p> <p>Accept equal water movement in and out</p> <p>Accept correct ref to water potential</p>	2

Question Number	Answer	Additional guidance	Mark
1 (g)(i)	<p>An explanation that makes reference to two of the following:</p> <ul style="list-style-type: none"> • stem cells can divide / perform mitosis (1) • stem cells can differentiate / specialise / stem cells can become any cell / other cell types (1) 	<p>Accept stem cells are undifferentiated / unspecialised</p>	2

Question Number	Answer	Additional guidance	Mark
1 (g)(ii)	<p>An answer that makes reference to two of the following:</p> <ul style="list-style-type: none"> • (there are) no antigens (present) / eq (1) • so antibodies will not be produced / no rejection / no immune response / eq (1) • any recipient / more people can receive blood group O (1) 	<p>Accept no surface proteins</p> <p>Accept blood group A/ B / AB can receive the blood / O is the universal donor</p>	2

Question Number	Answer	Additional guidance	Mark
1 (h)	<p>An answer that makes reference to two of the following:</p> <ul style="list-style-type: none"> • urea (1) • digested food / named example (1) • carbon dioxide (1) • hormone / named hormone (1) • mineral / ion / (not sodium / sodium chloride / salt) / vitamins (1) • protein / clotting factors / fibrinogen / antibodies / eq (1) 	<p>e.g amino acids / glucose / fatty acids / LDLs</p> <p>Accept named minerals / vitamins</p>	2

Total: 17 marks

Question Number	Answer	Additional guidance	Mark
2 (a)	<p>A description that makes reference to three of the following:</p> <ul style="list-style-type: none"> • enzymes (1) • (feed on) dead / decaying organisms (1) • for <u>extracellular digestion</u> (1) • absorb the digested food / nutrients (1) 	<p>Accept named nutrients</p> <p>Accept broken down food</p>	3

Question Number	Answer	Additional guidance	Mark
2 (b)(i)	<p>A description that makes reference to one of the following:</p> <ul style="list-style-type: none"> judgement of cloudiness is subjective / is qualitative / not quantitative / cloudiness cannot be accurately measured / cannot be repeated by other people / eq (1) 	<p>Accept cloudiness is judged by eye</p> <p>Accept cannot see small differences / it is imprecise</p> <p>Accept cannot measure difference in cloudiness</p>	1

Question Number	Answer	Additional guidance	Mark
2 (b)(ii)	<p>An explanation that makes reference to two of:</p> <ul style="list-style-type: none"> less kinetic energy / lower collision frequency / not at optimal temperature for enzymes / eq (1) less fungal growth / less mould / only slight fungal growth (1) less respiration (1) 	<p>Accept fewer E-S complexes formed</p> <p>Accept microbes / bacteria for fungi</p> <p>Accept less decay / less spoilage / less digestion</p>	2

Question Number	Answer	Additional guidance	Mark
2 (b)(iii)	<p>An explanation that makes reference to two of:</p> <ul style="list-style-type: none"> • enzymes denature (in acid / low pH / vinegar) (1) • active site shape changes / enzymes do not bind with substrate / eq (1) • fungal growth decreases (1) 	<p>Reject enzymes denature due to high temperature</p> <p>Accept fungi killed / less spoilage / less decomposition / less respiration</p> <p>Accept bacteria / microbes for fungi</p>	2

Total: 8 marks

Question Number	Answer	Additional guidance	Mark
3(a)(i)	<p>B is the correct answer</p> <p>A is incorrect as there are no palisade cells present</p> <p>C is incorrect as there are no palisade cells present</p> <p>D is incorrect as there are no palisade cells present</p>		1

Question Number	Answer	Additional guidance	Mark
3 (a)(ii)	<p>C is the correct answer (low humidity high temperature)</p> <p>A is incorrect because high humidity would reduce transpiration</p> <p>B is incorrect because high humidity would reduce transpiration</p> <p>D is incorrect because low temperature would reduce transpiration</p>		1

Question Number	Answer	Additional guidance	Mark
3 (b)(i)	(concentration of) carbon dioxide (1)		1

Question Number	Answer	Additional guidance	Mark
3 (b)(ii)	An answer that makes reference to two of: <ul style="list-style-type: none"> • temperature (1) • light (1) • mineral ions / pH / soil / eq (1) • water / humidity (1) 	Accept light intensity / wavelength / colour	2

Question Number	Answer	Additional guidance	Mark
3 (b)(iii)	140 (3)	Accept answers between 139 and 140 for 3 marks one mark for 70 AND one mark for area between 0.50 and 0.503 Correct answer gains all marks	3

Question Number	Answer	Additional guidance	Mark
3 (b)(iv)	<p>A discussion that makes reference to four of the following:</p> <ol style="list-style-type: none"> 1. carbon dioxide is needed in photosynthesis / eq (1) 2. fewer stomata may reduce uptake of carbon dioxide / less gas exchange (1) 3. fewer stomata needed if carbon dioxide is high / higher diffusion gradient of carbon dioxide (1) 4. (fewer stomata) reduces water loss / transpiration / evaporation / eq (1) 5. (less transpiration) prevents wilting (1) 6. (less transpiration) reduces mineral transport (to leaves) / reduces mineral absorption / eq (1) 7. less magnesium for chlorophyll / less nitrate for amino acids / eq (1) 8. (less transpiration) reduces cooling / eq (1) 	<p>Accept high carbon dioxide generates high diffusion gradient</p> <p>Ignore nutrients Accept named minerals</p> <p>Accept other correct minerals and functions</p> <p>less uptake of magnesium to make chlorophyll = 2 marks</p>	4

Total: 12 marks

Question Number	Answer	Additional guidance	Mark
4 (a)	<p>An explanation that makes reference to two of the following:</p> <ul style="list-style-type: none"> • (select and) mate fish that grow quickly / have desired characteristics / eq (1) • (select and) mate offspring that grow quickly / repeat breeding over several generations / eq (1) • (so that) genes / alleles for fast growth are passed on / eq (1) 	<p>Accept fish that do not waste food for grow quickly</p> <p>Ignore large fish</p> <p>Accept repeat with offspring</p>	2

Question Number	Answer	Additional guidance	Mark
4 (b)	<p>A description that makes reference to two of the following:</p> <ul style="list-style-type: none"> • nitrifying bacteria / nitrification (1) • (ammonium) to nitrite / nitrite to nitrate (1) 		2

Question Number	Answer	Additional guidance	Mark
4 (c)	<p>An explanation that makes reference to five of the following:</p> <ol style="list-style-type: none"> 1. waste food / faeces eaten / removed (by lobsters and crabs) / eq (1) 2. less decomposition / fewer decomposers / fewer bacteria (1) 3. less disease / infection (due to fewer bacteria) (1) 4. less (bacterial/ decomposers) respiration (1) 5. more oxygen in the water / less removal of oxygen / seaweed releases oxygen (1) 6. nitrate / minerals / nutrients / carbon dioxide removed by seaweed (1) 7. less algae growth / algal bloom / eutrophication / eq (1) 8. more products to sell (1) 9. no need to buy food for lobsters / crabs / no need to buy minerals for seaweed (1) 	<p>Accept converse for mps</p> <p>Accept (more) fish / animal respiration / eq</p> <p>Accept other correct named minerals Accept fish provide carbon dioxide for seaweed</p> <p>Accept can sell crabs / lobsters / seaweed</p>	5

Total: 9 marks

Question Number	Answer	Additional guidance	Mark
5 (a)	An explanation that makes reference to three of the following: <ul style="list-style-type: none"> • (selective) reabsorption (1) • in proximal convoluted tubule (1) • by active transport (1) • using energy / ATP (1) 	<p>Accept absorbed into blood</p> <p>Accept pct / first convoluted tubule</p>	3

Question Number	Answer	Additional guidance	Mark
5 (b)(i)	3.9 (2)	<p>one mark for 3.86...</p> <p>OR for $1700 \div 440$</p> <p>Correct answer gains all marks</p>	2

Question Number	Answer	Additional guidance	Mark
5 (b)(ii)	An explanation that makes reference to two of the following: <ul style="list-style-type: none"> • water is absorbed (1) • in collecting duct (1) • by osmosis (1) • ADH was present (1) 	<p>Accept urea is not absorbed</p> <p>Accept (water absorbed) in loop of Henlé / distal convoluted tubule</p>	2

Question Number	Answer	Additional guidance	Mark
5 (c)(i)	<p>A description that makes reference to two of the following:</p> <ul style="list-style-type: none"> • biuret (reagent) / sodium hydroxide + copper sulfate (1) • lilac / purple / pink (1) 	Accept uristicks / eq (1) colour change to blue or green (1)	2

Question Number	Answer	Additional guidance	Mark
5 (c)(ii)	<p>An answer that makes reference to two of the following</p> <ul style="list-style-type: none"> • protein is a large molecule (1) • high pressure <u>forces</u> protein / eq (1) • out of glomerulus / out of capillaries / through membranes / into (Bowman's) capsule / into glomerular filtrate (1) • the protein is not (re)absorbed (by nephron) (1) 	Accept pushes / squeezes	2

Total: 11 marks

Question Number	Answer	Additional guidance	Mark
6 (a)	<p>C is the correct answer (UAAGGCUCA)</p> <p>A is incorrect as T is not present in RNA</p> <p>B is incorrect as T is not present in RNA</p> <p>D is incorrect as the sequence is not complementary</p>		1

Question Number	Answer	Additional guidance	Mark
6(b)	<p>C is the correct answer (translation anticodon)</p> <p>A is incorrect because it is not transcription</p> <p>B is incorrect because it is not transcription</p> <p>D is incorrect because it is not a codon</p>		1

Question Number	Answer	Additional guidance	Mark
6 (c)	<p>An explanation that makes reference to three of the following:</p> <ul style="list-style-type: none"> • mutation is a <u>rare / random</u> change to DNA / genetic material (1) • change in nucleotides / bases / triplets / eq (of DNA) (1) • change (in sequence of) amino acids (in proteins / polypeptide) (1) • changing enzyme / protein / producing different protein / enzyme / eq (1) 	<p>Accept codons</p> <p>Accept changing active site / changing shape of protein</p>	3

Question Number	Answer	Additional guidance	Mark
6 (d)(i)	An description that makes reference to three of the following: <ul style="list-style-type: none">• use of quadrat / gridding of area / eq (1)• random (selection of areas) (1)• count butterflies / eq (1)• repeat / means / eq (1)	Accept quadrats for two marks (mp1 and mp4)	3

Question Number	Answer	Additional guidance	Mark
6 (d)(ii)	<p>A discussion that makes reference to five of the following:</p> <ol style="list-style-type: none"> 1. increase in abnormal butterflies / more abnormal butterflies after 10 months (1) 2. (due to) longer exposure to radioactivity / eq (1) 3. larger increase in number of abnormal / mutated offspring (compared with adult after 10 months) (1) 4. mutations / genes / eq passed on to offspring (1) 5. recessive mutations may be carried by adults / eq (1) 6. if heterozygotes / carriers mate they may produce abnormal offspring / eq (1) 7. other factors could cause the abnormalities / abnormalities may not be due to mutations /not genes / DNA(1) 8. there is no control experiment / no data before the accident / no idea of normal number of abnormalities / eq (1) 9. radioactivity not measured / monitored / radioactivity may change / decay / eq (1) 10. do not know number of butterflies sampled / eq (1) 	<p>Accept adult / offspring / both</p> <p>Accept longer exposures increases number of mutations</p> <p>Accept more abnormal offspring than abnormal adults</p> <p>Accept adults increase by 15.7 and %, offspring increase by 41.9 %</p> <p>Accept no idea of health of butterflies / disease</p> <p>Accept no data from area with no radioactivity</p> <p>Accept no idea how long radioactivity lasted / changed</p> <p>Accept experiment has not been repeated / small sample size</p>	5
